Knowledge of building design and construction means, methods, and techniques

Knowledge of architectural history and current architectural design discourse

Awareness of sustainable design approaches

About BLT Architects

BLT Architects, now in its 55th year of practice, is an integrated architecture and interior design firm with expertise in mixed use, residential, hospitality, office and higher education projects in urban environments.

We are committed to delivering inspired design that makes both our client and their community proud when the project is complete.

We create environments that satisfy the diverse needs of clients and users: functional and financial, aesthetic and emotional, immediate and strategic.

We respond to context. We do not impose our will on the world. We work with what exists to create a greater whole, through similarity or contrast, as appropriate for each specific project.

We advance the goals of a socially, economically and technologically sustainable world.
