

# AndersonMasonDale

AndersonMasonDale Architects in Denver currently has some very exciting, large projects in the pipeline. As such, we are currently looking to hire several thoughtful, highly-motivated project architects and designers of varied levels of experience (from recent graduates to mid and later-career professionals.)

Applicants should be interested in working for a firm that is invested in its local community and its people (AMD was recently awarded Colorado's "Firm of the Year" this past Friday), values hard work but also work/life balance, and is currently contributing to a range of exciting public, institutional, cultural, and commercial projects (recent work includes the train terminal for Denver International Airport, several large-scale academic buildings for different Colorado-based universities, a courthouse in Montana, etc.) For additional representative work, interested applicants should visit the firm's website: [www.amdarchitects.com](http://www.amdarchitects.com).

It's worth noting that Denver and its surrounding areas are experiencing unprecedented growth—it's a challenging and exciting time to be an architect here. Please have interested applicants respond to me directly with the following materials:

- (1) a cover letter indicating potential applicants' interest in working for AMD specifically,
- (2) a current resume, and
- (3) work samples, 5MB Max file size (or a link to an online portfolio)

Thank you for your time and help in this matter! Please feel free to circulate this e-mail to our alumni network.

Best,  
Beth Mosenthal (MArch, Class of 2009)
