Commercial Architect  
5-10 Years' Experience

Siemasko + Verbridge, is an award-winning architecture and interior design firm focused on high-end custom residences, commercial and institutional work. We are a thriving firm of 22 professionals distinguished by our creative and supportive work environment. We are seeking a qualified architect to join our commercial design team, with an opportunity for close mentoring relationship.

**THE CANDIDATE:**  
Experienced Project Architect

Required Qualifications:

- BArch or MArch
- Proficiency in technical production in construction documents and specifications
- Proficiency in Revit
- An ability to accomplish tasks within project deadlines and budgets
- Experience in project management on small to medium size projects

**THE JOB:**  
Responsibilities:

- To be an integral production part of a team on large commercial projects
- To independently manage production client interaction and construction administration on select projects
- To develop and maintain a high standard in both design process and product
- To interact with consultants, to include structural, mechanical, and lighting engineers
- To develop presentation drawings and materials

Siemasko + Verbridge is located in the historic New England towns of Beverly and Chatham, MA. This position is for our Beverly office, located within walking distance of the North Beverly Commuter Rail station and offers free off-site parking.

Qualified applicants, who desire a creative and professional work environment, send resume, cover letter and work examples (5MB max file size) to:

Mr. Stefano Basso, Architect (2012 BArch alumnus)

**Testimonial from Mr. Basso:**

I've worked at S+V since graduation and can vouch for the stability and professionalism of the office. We have a great office culture that is anchored by a strong work ethic and a sense of humor! S+V has a robust business model and treats its employees really well. As a young architect, there are ample opportunities for mentorship from PM's and principals to learn the fundamentals of design, project management and building construction. It's a great spot for somebody that is looking to work outside of the city and still do high caliber design!
