

HACKER

Hacker is currently seeking qualified candidates with NAAB-accredited degrees in Architecture and 3 to 7 years' experience to join our creative teams. Individuals should demonstrate excellent design and technical skills with a focus on sustainability. Candidates should be fluent in Revit and SketchUp. Strong rendering and drawing skills are preferred.

Well-known for our design of public buildings and urban spaces, Hacker's work includes libraries, university buildings, museums, and theaters; more recently our portfolio has expanded to include single and multifamily housing, and commercial office buildings. We have received numerous national, regional and local design awards; we were named the AIA NW & Pacific Region Firm of the Year award for 2013, and ranked 8th overall in ARCHITECT magazine's "Architect 50" list of best architecture firms. Hacker received recent national recognition for excellence in sustainable design and for our collaborations with the construction industry.

We are organized as a studio practice. Our staff of forty works collaboratively in an open studio, coming together for investigative discussions and creative brainstorming. The integrity of our client's values, the quality of the work experience for our staff, and a deep respect for the people who build our designs underpin our creative process.

Hacker is an equal opportunity employer. We champion social equity and mentorship.

Please send a single PDF (5MB max file size) that includes a letter of interest, your current resume and concise work samples or a link to your online portfolio to: opportunities@hackerarchitects.com
