Fall 2020			650.1 Architectural Research		641 ** Intro to Arch. Discourse	622 Building Systems Design 2					7
Spring 2021	606 Architectural Design 3	682 Media 2	650.2 Architectural Research	631 * Studies in Arch. Histories			611 * Structures 1				16
Summer 2021 NYC/ Three Cities	609 Architectural Design (Visiting)								500+ Professional Elective		9
Fall 2021	607 Architectural Design 4		650.5 Architectural Research	639 * Architectural History Principles		623 Advanced Building Systems					13
Spring 2022	998 Thesis (Directed Research)		650.4 Architectural Research	500+ History Elective	642 Theory & Design Research						13
Summer 2022	608 Architectural Design (Visiting)								500+ ** Professional Elective		9
Fall 2022		585 Professional Practice				500+ Technology Elective	612 * Structures 2				9
											76

**Notes:**

\* All incoming students for the fall of 2020 are eligible to take equivalency exams for ARC 611/612 and ARC 631/639. Those who demonstrate proficiency in these subjects through these exams will receive credit for these courses and may enroll in elective coursework in its place.

\*\* All students currently enrolled in the English for Architecture program, as well as those who are recommended to based on the results of the English Language Assessment Exam, enroll in ARC 651 (Language and Discourse in Architecture) in place of ARC 641 in the Fall 2020 and enroll in ARC 641 in Fall 2021. These students take one fewer Professional Elective course.

Introduction to Architecture (ARC 641), Architectural Research (ARC 650, section 1), and Building Systems II (ARC 622) will be offered either fully-online or in “hyflex” (supporting both online and in-person enrollment) formats to support engaged collaboration and immersive learning, regardless of your physical location.

We recommend that all incoming advanced standing students enroll in these three courses to commence the degree this fall. Students may additionally enroll in School of Architecture Professional, Technology, or History electives; and/or on a space-available basis, Professional Practice. These courses as well will be offered in either fully online or hyflex formats. We recommend a maximum enrollment of thirteen credits for the Fall 2020 term instead of sixteen as indicated in our currently-published curriculum template.

The Design Futuring studio (ARC 606), is rescheduled from Fall 2020 to Spring 2021 for all students with the anticipation that this will be a primarily on-campus experience for all. This will afford greater lead-time for those of you facing delays in acquiring your student visa, or who may not, due to travel restrictions or other personal constraints, be able to be on campus this fall. We have indicated that the displaced ARC 608 studio be taken in the summer of 2022, but it may also be taken in Fall 2022.
